

MIDDLE SCHOOL

MINISTRY RESOURCES

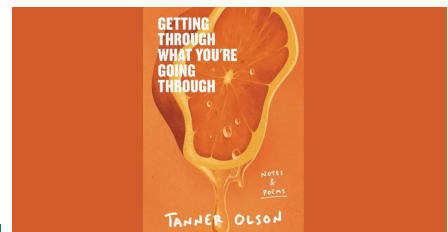

September 3, 2026

For Participants in LEA's Middle School Educators Network

Students can use an old ELA tactic—word sorts—to understand how different math concepts are related, allowing them to decode increasingly complex problems. Learn more at [How to Deepen Math Learning With Word Sorts](#) (Hoa P. Nguyen in *Edutopia*)

Did you listen to Tanner Olson's [WOW video](#) on August 19th? He has some books you might be interested in reading or using in the classroom. Check out [Getting Through What You're Going Through: Notes and Poems for Hoping and Becoming](#) and [All the Things I Say to God](#) (Children's book on prayer).

[10 Hands-On Fall Science Activities Your Students Will Love](#) has a variety of activities that are perfect for your science classroom. They have been divided into activities for life science and activities for physical science. Take a look at them and consider adding them to your Fall line-up of lessons. (*ISTEM*)
